

MANO EDU

learning with a smile

MANO EDU is a battery-powered video magnifier that comes on a foldable tripod. It consists of two cameras (one for reading and one for distance viewing). The latter can be rotated in all directions. Both cameras convince with Ultra HD 4K resolution and can also be viewed simultaneously on the 12.5" touch display by means of the integrated split-screen function. The viewing angle of the display can be adjusted continuously, and the keystone correction compensates for distortions.

Equipped with a read aloud function, you can capture an entire A4 page at the touch of a button and have it read aloud. The capture of multiple pages in a document and the ability to copy external image- and text files from the PC to the device, make MANO EDU a versatile companion in all situations.

The optionally available second monitor (Multiview screen) does not require a separate power supply, can be mounted above the main display and offers a comfortable split-screen function when using the distance camera on a regular basis.

MANO EDU

more than simple magnification

Your benefits at a glance

- FullHD 12.5" touch display (approx. 31.8 cm diagonal) on a foldable stand
- approx. 1 x to 60 x magnification in reading mode
- integrated read-aloud function captures an entire A4 page
- easy operation via the tactile keys or the touch display
- reading camera with integrated LED illumination; distance viewing camera can be rotated in all directions and used as mirror and second document camera
- foldable and easy to transport with a practical carrying handle
- optionally available: second monitor for true split-screen function, replaceable battery and battery charging station

The distance camera can be rotated in all directions. If the camera points away from the device, you can use it as a distance camera. If you turn the camera towards you, it automatically switches to the mirror function. When oriented horizontally, it can be used as a second document camera to take notes, e.g.

MANO EDU can be upgraded with a second monitor so that you can simultaneously view the images from both cameras in full size. The second monitor fits easily into the rear side of the tripod and does not require a separate power source. Images, text and PDFs from an SD card can also be viewed and permanently saved on MANO EDU.

In addition to the magnification function, you can also have texts read aloud with MANO EDU.

Documents up to A4 can be captured with the device. Multi-page documents can be saved as one PDF. External files can also be read aloud or viewed enlarged.

MANO EDU supports more than 15 different languages, which can be selected via the internal menu. This means you can also use the read aloud function in foreign language lessons, if required.

The removable glare shield can be attached to the rear side of the stand and blocks disturbing light reflections from other light sources. The device can be folded quickly and easily and transported well protected in the included bag.

MANO EDU		order code: MANOEDU1	
	12,5" touch display with approx. 31,8 cm diagonal storage capacity: approx. 2 GB autofocus (can be switched off)		
	approx. 1 x - 60x in document mode		
	system resolution 1920 x 1080 pixel 2 cameras for near and distance viewing in Ultra HD 4K resolution (3840 x 2160 Pixel)		
	true colors, up to 16 selectable semi colors		
	Read aloud function: more than 15 languages with selectable voices are included		
	replaceable Lithium Ion battery operating time approx. 4.5h - 5.5h charging time approx. 3 h		
	Weight 2.4 kg/5.3 lbs (including battery) W x H x D set up approx. 38 x 25 x 26 cm/15 x 9.8 x 10.2 in, folded approx. 38 x 4 x 26 cm/15 x 1.6 x 10.2 in		
	scope of supply: carrying case, HDMI cable, power supply with country specific adapter, cleaning cloth, light shield, user manual, quick reference guide		
	Available options: MultiView screen, spare battery, charging station
