

Annie

The world's first self-learning braille literacy device

Designed to give pre-school and primary school-aged children a head start in learning Braille, Annie is a self-learning electronic Braille device that teaches reading; typing; vocabulary and spelling in uncontracted and contracted Braille in a fun, game-like format.

Why Annie?

Gamified

FUN, Interactive premium content designed by curriculum experts.

Connected

Can be monitored easily.
Enables special educators to focus on multiple students at the same time.

Human

Unlike conventional text-to-speech tech, Annie has a friendly human voice that guides students, making learning more effective.

Smart

Gives instantaneous feedback for mistakes and continuously evaluates user.

Innovative

Patent pending device which has all the hardware modules tailored to teach braille.

Inclusive

Equips parents and regular teachers to cater to a child with additional needs.

With **Annie**, students with visual impairment can **learn** to **read**, and **type** in braille on their own, while **having fun**!

Reading

- Twin large braille cells to introduce the child to braille.
- Six standard-sized braille cells cover all primary learning needs including contractions.

Interactive Content

- Annie accomplishes these outcomes through gamified content, challenges and tests.
- Built in speakers or headphones to adapt to your surroundings.
- Homework content suitable for all age groups.

Typing

- Universal design based on the standard brailier.
- Soft keys that are much easier to press than those of a mechanical typewriter.
- Nurture students' typing abilities and foster muscle memory to enhance their typing proficiency.

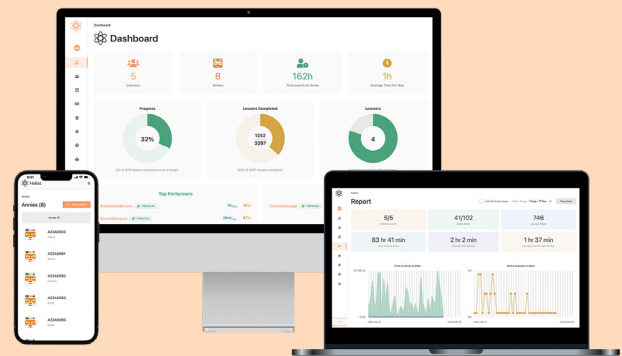

Self-Learning

- Annie® lets children play and learn braille by themselves.
- Assign homework and schedule tests for your student to complete at their own pace.

Annie's **learning ecosystem** offers interactive content to students while **collecting usage data**.

It provides an online teacher portal for remote access and progress tracking, serving both educators and parents.

Annie ecosystem: Helios suite

one-year subscription to Helios included with purchase

- Track student progress, suggest lessons.
- Manage tests, assignments, content.
- Visualize usage, generate reports.
- Compare results, work offline/online.

Annie ecosystem: Content

- Local medium of instruction & accent
- Grade 1 and 2 English (Uncontracted and contracted braille)
- Lessons for numbers, punctuation.
- Extensive word banks for vocabulary.
- Fun interactive games & challenges.
