Smart home system

Visit Smart home

Meet the helpful home.

Your home is the centre of your life. It's where you sleep, it's where your family lives, and it's where you feel safe. The Visit system is designed to watch out for your home so you can focus on yourself and your loved ones.

So when you've got your hands full, Visit will help you to keep tabs on ringing phones, simmering pots and buzzing doorbells.

Doorbell monitoring

Visit monitors the doorbell and alerts you when your friends arrive.

Telephone monitoring

Visit monitors your phones and alerts you to calls and messages.

Baby monitoring

Visit monitors your little one and alerts you to every little gurgle.

Fire protection

Visit supervises your home and wakes you if a fire should occur.

Doorbell monitoring

Know when your guests arrive.

Preparing family dinners is always a busy task. There's food to cook, beds to make and the house springs to life with sizzling pans, whirring blenders and whining vacuum cleaners.

Visit tells you when your guests are at the door, so you can keep track of the comings and goings in your home.

By the front door

When your friends are at your doorstep and ring the doorbell.

In the hallway

The door transmitter signals the pager on your belt.

On the belt

The pager's gentle vibrations tell you that your guests have arrived.

Telephone monitoring

Stay in touch with your loved ones.

In today's global society, family and friends are living in all corners of the world. Then it's good to know that your dear ones are just a phone- or video call away.

Visit tells you when you receive a call or message and helps you to stay in touch with the ones you care about the most.

On the phone

When your landline- or mobile phone rings or receives a message.

In the hallway

The telephone transmitter signals the flash in your living room.

On the coffee table

The bright lights show you that someone is trying to reach you.

Baby monitoring

Always close to your little one.

Caring for your baby's health and safety is one of the most important things you do as a parent. Visit keeps a watchful eye on your baby around the clock and senses every little gurgle.

Knowing you're connected to your little one as she is safely tucked in will give you the peace of mind to get some rest too.

In the crib

When your loved one wakes up and calls for your attention.

In the nursery

The baby monitor signals the receiver on your wrist.

On the wrist

The vibrations tell you that your baby needs you.

Fire protection

Protect your home and family.

The material in today's furniture makes fires burn faster, and nowadays it can take less than 5 minutes for a fire to take over a room. Visit discovers smoke and smouldering fire at an early stage and relays the alarm directly to your bedroom.

Knowing that you can get out of harm's way in time provides a peaceful night's sleep for both you and your family.

In the living room

If a fire should break out while you are asleep.

On the ceiling

The smoke alarm signals the alarm clock in your bedroom.

In the bedroom

The powerful sound, flashes and vibrations wake you at once.

The receivers.

Everyone's taste is different, and one-size-fits-all doesn't always fit you. That's why we created a family of receivers that work seamlessly with each other, your home and your lifestyle.

BE1442 Flash receiver

Alerts you with bright flashes.
Produces a clear light that is visible even in larger rooms.

BE1470 Pager receiver

Alerts you with gentle vibrations.
Lightweight and can be worn on your belt or in your pocket.

BE8102 Wrist receiver

Alerts you with gentle vibrations.
Small and discreet. Wear it around your wrist like a regular watch.

BE1450 Portable receiver

Alerts you with powerful sounds.
Wireless and easy to bring to the balcony or garden.

BE1580 Alarm clock

Wakes you with sound, bright flashes and powerful vibrations under the pillow or mattress.

Living with Visit.

Here's an example of Visit in a typical home.
What's your ideal setup?

1 Door transmitter
